Xcel Certified Sites

The City of Rosemount participated in Xcel Energy’s site certification process to aid in attracting new industries. City staff worked with Xcel to gather appropriate information for the site certification process. Three sites were certified at the conclusion of the process. These certified sites, verified through a third-party consultant, have gone through a complete assessment and are shovel ready for Business Park and Light Industrial development.

The sites include a [300-acre parcel](#) in UMore Park, a 160 acre parcel controlled by OPUS, and a [145 acre parcel](#) located in the Rosemount Business Park. Fifty-two of those acres in Rosemount Business Park are also certified through the State of MN, DEED “Shovel Ready” program.
